-"Why will ye die?"

The fight of science is penetrating the mist which has so long shrouded the cause of Ariatic Cholera. Eminent physicians and naturalists in Europe, and in this country, have ascertained beyond doubt the presence of vast numbers of animal-cule in the atmosphere of places infected by this as well as other diseases. The "myriad races" of these insects, in their various kinds, are therefore believed to be the medium by which epidemical and contagious diseases are spread. A similar opinion was advanced by the French Medical school, and different persons, in 1832; although the admirable scientific plans for investigation, above noticed, were not then attained, nor published early enough in the past season to be of general advantage. It is well known that an eminon physician of France ascertained, by an experiment on his own person, that the disease commonly called "Itch" is caused by animalcules, which the form of sulphur (among its other admirable qualities) promptly destroys; a strong coincidence with which, appears in a fact published late in the past season, that persons whose systems were intentionally impregnated with this "potent agent," or accidentally, (such as attendants in works where gus is obtained from bituminous coal.) enjoyed perfect immunity from cholera.

The only known means, even at the present day for applying this, or any other vapor, to the human system in a portable and safety recumber manner; is the apparatus invented by the undersigned, in the State of Ohio, and lately completed by him in Turkey; by adapting it to giving the far-famed and salutary baths of that country. This machine can be used any searce, which perfect case, then placed entirely out of the way, and costs but a trifle, as a considerable part-can be made by females. Houses. These documents show the admirable power of different applications in this apparatus of promoting health at all times, ("means which no family should be without,") and aiding the physicians in its restoration. For a sample of their opinions, as to its advantages in Cholera, the following extract from one given by the estimable and well-experienced Chief of Bureau of Medicine and Surgery, is offered: "The improvement which you have made in your bathing apparatus, I very highly approve, as it combines means which must be highly serviceable. Its structure is simple, and easily managed in its adaptation to Cholera," &c. Statements of recent remarkable cases also given. Applied at the office of the undersigned, City Hall, east-wing basement, No. 28, and at the residence of the sick. VIEW OF WASHINGTON CITY AND

WE are indebted to the publisher, Mr. Casimir Bohn, of this city, for a splendid lithographic view of the city of Washington and Georgetown, and the adjacent country, including, upon the margin, particular representations of the important public buildings, and other objects of interest in the city and victnity. The view seems to have been taken from the terrace at the Capitol, and embraces the whole range of Pennsylvania avenue, and the remaining portion of the city westward from that point. It is very correct and very faithfully executed. It is altogether superior to any view of Washington and its vicinity which we have ever seen. It forms a beautiful and pleasing picture, and will be deemed a very desirable ornament for the parlor. It is a work involving great labor on the part of the artist, and considerable expense on that of the publisher, which we trust may be amply remunerated by a liberal and generous patronage on the part of the public. It may be had of Mr. Bohn, the publisher, at his stand at the Capitol, and probably at the stores of the booksellers in this city.—Union.

FOR THE CURE OF

Colds, Coughs, Asthma, Influenza, Croup,
Whooping Cough, and Consumption.

THE uniform success which has attended the use
of this preparation—its salutary effect—its
power to relieve and cure affections of the lungs,
have gained for it a celebrity equalled by no other
medicine. We offer it to the afflicted with entire
confidence in its virtues, and the full belief that it
will subdue and remove the severest attacks of discase upon the throat and lungs. These results, as
they become publicly known, very naturally attract the attention of medical men and philanthropists every where. What is their opinion of Cherry
Pectoral may be seen in the following:

throat and lungs."

From Edward Hitchcock, M. D., I.L. D., President of Amheret College.

J. C. Aver.—Sir: I have used your Cheery Protoral in my own case of deep-seated bronchitis, and am satisfied, from its chemical constitution, that it is an admirable compound for the relief of laryngial and bronchial difficulties. If my opinion as to its superior character can be of any service, you are at liberty to use it as you think proper.

I deem the Cherry Pectoral an admirable composition from some of the best articles in the Materia Medica, and a very effective remedy for the class of diseases it is intended to cure.

READ THE EVIDENCE.

HARTFORD, Jan. 26, 1847.

Dr. J. C. Aven—Dear Sir: Having been rescued from a painful and dangerous disease by your medicine, gratitude prompts me to send you this acknowledgment, not only in justice to you, but for the information of others in like affliction.

A slight cold upon the lungs, neglected at first, became so severe that spitting of blood, a violent cough and profuse night-sweats followed and fastened upon me. I became emaciated, could not sleep, was distressed by my cough, and a pain through my chest, and in short had all the alarming symptoms of quick consumption. No medicine seemed at all to reach my case, until I providentially tried your Cherry Pretornal, which soon relieved and now has cured me.

Yours with respect, E. A. STEWART.

BLACKWOOD'S MAGAZINE

And the British Quarterly Reviews.

PREMIUMS TO NEW SUBSCRIBERS!

OWING to the late revolutions and counter revolutions among the nations of Europe, which have followed each other in such quick succession, and of which "the end is not yet," the leading periodicals of Great Britain have become invested with a degree of interest hitherto unknown. They occupy a middle ground between the hasty, disjointed, and necessarily imperfect records of the newspapers, and the elaborate and ponderous treatises to be furnished by the historian at a future day. The American Publishers, therefore, deem it proper to call renewed attention to these Periodicals, and the very low prices at which they are offered to subscribers. The following is their list, viz:

THE LONDON QUARTERLY REVIEW,
THE EDINBURGH REVIEW,
THE NORTH BRITISH REVIEW,
THE WESTMINSTER REVIEW, and
BLACKWOOD'S EDINBURGH MAGAZINE.
In these periodicals are contained the views, mod-PREMIUMS TO NEW SUBSCRIBERS!

BLACKWOOD'S EDINBURGH MAGAZINE.

In these periodicals are contained the views, moderately, though clearly and firmly expressed, of the three great parties in England—Tory, Whig, and Padical. "Blackwood" and the "London Quarterly" are Tory; the "Edinburgh Review," Whig; and the "Westminster Review," Liberal. The "North British Review" owes its establishment to the last great ecclesiastical movement in Scotland, and is not ultra in its views on any one of the grand departments of human knowledge; it was originally edited by Dr. Chalmers, and now, since his death, is conducted by his son-in-law, Dr. Hanna, associated with Sir David Brewster. Its literary character is of the very highest order. The "Westminster," though reprinted under that title only, is published in England under the title of the "Foreign Quarterly and Westminster," it being, in fact, a union of the two Reviews formerly published and reprinted under separate titles. It has, therefore, the advantage by this combination of uniting in one work the best features of both as heretofore issued.

TERMS.

The above periodicals are reprinted in New York, immediately on their arrival by the British steam; ers, in a beautiful clear type, on fine white paper, and are faithful copies of the originals, Blackwood's Magazine being an exact fac-simile of the Edinburgh edition.
